EDUCATION

B.S in Computer Science, Zagazig University, Egypt

Oct. 2022 – Jun 2026

- **GPA:** 3.2/4.0 **Relevant Coursework:** Data Structures & Algorithms, OOP, Databases, OS, Distributed Systems, Compiler Design, Software Architecture, Big Data.

LEADERSHIP

Technical Instructor & Mentor

2025 – Present

ICPC Zagazig Community

Egypt

- Mentoring **100+** students on Advanced DSA, with focus on **Dynamic Programming** and **Graph Theory**.

OPEN SOURCE CONTRIBUTIONS

Oppia 🐙 — *Open-source educational platform (6.6k ★, Google-supported nonprofit)*

Jan 2026 – Present

- Fixed a **double confirmation modal** in Serial Chapter Mode by refactoring the story-editor navbar to call the publication service directly, eliminating a redundant UI layer. **#24508** **#24527**
- Resolved a **WCAG 3.1.1 accessibility violation** by adding the missing `lang="en"` attribute to base HTML templates, fixing screen reader and SEO correctness before JS hydration. **#24923**
- Eliminated a **flaky CI test** in the subprocess suite by scoping assertions to `stdout`, removing intermittent failures from gRPC background thread noise under CI resource contention. **#25223** **#25061**

Lichess (lila) 🐙 — *Open-source chess server (17.9k ★)*

Dec 2025

- Removed a **legacy dead-code endpoint** (`/api` route) causing white screens in dev environments, superseded by a reverse-proxy-served API docs route. **#18812**

PROJECTS

Bosla — **AI Learning Platform** 🐙 | **API** 🐙 | **Pipeline** 🐙 | *.NET 10, ASP.NET Core, EF Core, ONNX Runtime, SQL Server* 2025 – P

- Architected a **REST API** using **Clean Architecture** (Onion) with the Specification Pattern, fully decoupling business logic across Domain, Service, and Persistence layers.
- Built a real-time **AI inference pipeline** over WebSockets with **ONNX Runtime**; integrated Google Gemini for personalized learning roadmap generation.
- Deployed with **Docker** on SQL Server via EF Core, ensuring reproducible and environment-parity builds.

BlitzMate Chess Engine 🐙 | *Python, Bit Manipulation, Algorithms*

2025 – Present

- Built a high-performance engine using **Bitboards**, **Alpha-Beta Pruning**, **Negamax**, and **Zobrist Hashing** to maximize move-selection depth via efficient bit manipulation.

Sarab — **Tunneling Automation CLI** 🐙 | *.NET 10, Cloudflare API, SQLite*

2026

- Automated DNS and ingress orchestration for local-to-cloud exposure, cutting manual configuration overhead by **40%**.
- Shipped as a **zero-dependency, self-contained binary** with SQLite-backed multi-identity state and secure SSH tunneling for public-IP-free remote access.

Skyra — **Weather Prediction** 🐙 | *Python, FastAPI, NASA API*

2025

- Built a low-latency **FastAPI** backend integrated with **NASA Open APIs** for real-time environmental data processing and weather prediction.

TECHNICAL SKILLS

Languages: C#, C++, Python, TypeScript, SQL, HTML/CSS

Technical: OOP, Data Structures & Algorithms, Clean Architecture, Design Patterns, RESTful APIs, CI/CD, Testing

Frameworks: ASP.NET Core, EF Core, Dapper, ONNX Runtime, FastAPI

Databases & Cloud: SQL Server, PostgreSQL, Redis, Azure Cosmos DB, Azure

Developer Tools: Git, GitHub, Docker, Linux

ACHIEVEMENTS & COMMUNITY

Competitive Programming: **350+** problems solved on Codeforces/LeetCode (**Handle: Medo00**); active ICPC competitor.

Technical Content: Founder of “**DarkCipher00**” (YouTube).

Chess: **Top 5%** globally (**1700+** rating) on Chess.com.
